

Empower your back-office team to efficiently manage and track customer documents, ensuring compliance and efficient KYC processes.

- Document Categorization: Organizes documents by type (e.g., Proof of Identity, Proof of Address).
- Status Tracking: Clearly displays the status of each document (Pending, Accepted, Rejected).
- Information Completeness: Indicates whether documents have "Missing Info" or "Has Info" to quickly identify areas needing attention.
- Document Details: Shows specific document details (e.g., "Passport of Dhruv Patel," expiry dates).
- Search and Filtering: Allows for easy searching by customer name or document type and filtering by status, date, or information completeness.
- **Visual Cues:** Uses visual cues (e.g., checkmarks for accepted documents, warning signs for missing information) for quick assessment.
